

Floor Protective Coverings

Protect & Protect Strong

**Protect
your sports
and indoor floor!**

with floor protection plates

***Protect &
Protect Strong***

**Over 100,000 m²
are already
regularly in use
as:**

- **sports hall
protective covering**
- **multi-purpose hall flooring**
- **reusable exhibition floor**
- **carpet on grandstands
and stages**
- **floor mats for entrances
and transitions**

Multi-purpose protective coverings from BÜTEC are so easy to handle that even large areas can be laid within a very short time. The BÜTEC hall protective covering allows a simple and quick installation on the hall underground without additional gluing. An innovative undercoating of the extremely robust needle fleece surface prevents slipping and reduces the leakage of usual liquids to the substrate.

280m² are stored on a transport trolley!

In contrast to heavy and bulky rolled goods, the blanks can be moved inside the hall by anyone on a smooth-running transport and storage trolley. Heavy soiling within the entire area can be removed immediately by simply exchanging the 2 m² blank.

BÜTEC floor protection coverings create atmosphere!

An optimal ratio between own weight and size of the circuit board allows an easy application. Taking the hall temperature into account, the **BÜTEC PROTECT** floor covering adapts to the floor covering like a whole carpet. The individual joints are hardly visible.

Important features:

antistatic

sound-absorbing

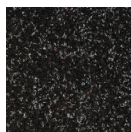

flame retardant

Technical data *Protect Strong*

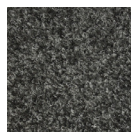

Article no.: 7203-2

Size of the plates:	2 m x 1 m
Fire protection:	BflS1
Strength:	6,8 mm
Top layer:	fibre bonded
Back covering:	innovative special coating
Weight per plate:	3,49 kg per m ²

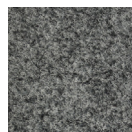

Colors:

black

dark grey

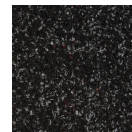

light grey

Technical data *Protect*

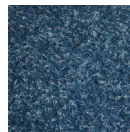

Article no.: 7204-2

Size of the plates:	2 m x 1 m
Fire protection:	BflS1
Strength:	5,6 mm
Top layer:	fibre bonded
Back covering:	innovative special coating
Weight per plate:	3,18 kg per m ²

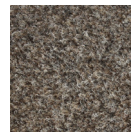

Colors:
